

CHRISTIAN JOHN COMENDADOR

Dasmariñas, Cavite | 0976-567-9285 | comendadorchristianjohn@gmail.com

PROFESSIONAL GOAL

Computer Engineering graduate passionate about software development, web technologies, and problem-solving. Knowledgeable in building responsive and user-friendly web applications using modern development tools and frameworks. Currently expanding my skills in frontend, backend, and mobile application development with a focus on creating practical and scalable solutions. A fast learner who is adaptable, detail-oriented, and eager to contribute to development teams through continuous learning, collaboration, and effective technical problem-solving

WORK EXPERIENCE

Yuanshan Electronics Philippines Inc.

March 2026 – April 2026

- **Process Engineer Intern**
- Prepared technical work instructions for transformer production.
- Assisted in converting engineering drawings using AutoCAD.
- Recorded production process data and ensured documentation accuracy.
- Collaborated with engineering teams to improve production workflow.

EDUCATION

2022 - 2026

Philippine Christian University Dasmariñas Cavite

- Bachelor of Science In Computer Engineering

PROJECTS

ApexWealth | Personal Income & Expense Tracker

- Developed a responsive personal finance management web application.
- Implemented secure authentication using JSON Web Tokens (JWT) and Express.js middleware.
- Utilized Next.js App Router and Layouts to build a seamless single-page application experience.
- Built intuitive dashboards for tracking income, expenses, and financial analytics.

Personal Portfolio Website

- Designed and developed an interactive developer portfolio featuring 3D elements and seamless animations.
- Showcases personal projects, technical proficiency, and professional certifications
- Built with a responsive, modern UI focused on performance and engaging user experience.

Smart Automated Animal Feeding Dispenser for Rescued Cats and Dogs

- Designed and developed an automated feeding system for rescued cats and dogs to improve feeding efficiency.
- Integrated ESP32 and Raspberry Pi for system automation and communication.
- Implemented an ESP32-CAM monitoring system to provide real-time visual monitoring of the feeding area.
- Developed hardware and software integration to support reliable feeding schedules and remote system monitoring.

ACHIEVEMENTS & CERTIFICATIONS

- Dean's Lister (2022)
- Dean's Lister (2023)
- UI/UX Design using Figma
- Network Addressing and Basic Troubleshooting

SKILLS & INTEREST

- Analytical Thinking & Troubleshooting
 - Adaptability & Rapid Learning
 - Technical Communication & Teamwork
 - Time Management & Attention to Detail
 - User-Centric Design Thinking
 - Interests: Mobile Application Development (React Native / Flutter)
 - Interests: Game Development & Design (Unreal Engine / Unity)
-

TECH STACK SKILLS

- Web Development: React, Next.js, HTML5/CSS3, Tailwind CSS, Node.js, Express.js
 - Programming Languages: TypeScript, JavaScript, SQL
 - Data & API Management: Firebase, JSON, PostgreSQL, Prisma ORM, RESTful APIs, JSON, JWT (JSON Web Tokens), Google Auth
 - Frameworks & Libraries: Three.js, GSAP, Framer Motion
 - Tools & Design: Git, GitHub, Vercel,
 - Libraries & Animation: GSAP, Framer Motion, Recharts, Lucide React
 - Embedded System: C++, Raspberry Pi, ESP32.
-
